Photovoltaics
Circular economy
Cleantech entrepreneurship
Business development

Profile

Physicist turned business leader with three decades at DuPont, bringing new materials technologies to market across the electronics and solar industries. For more than a decade he led DuPont Photovoltaic Solutions' marketing and business development across Europe, the Middle East and Africa, with a focus on long-term reliability of solar modules in demanding climates. He is now co-founder and CTO of DOTSun, a French cleantech start-up that repairs, revamps and extends the lifespan of photovoltaic modules on site, and leads Bee Solar's projects for low-carbon European solar manufacturing and power generation.

Experience

DOTSun – Co-founder & Chief Technology Officer ..... 2022 – present
Var, France
Cleantech start-up (société à mission) for the on-site repair, revamping and life extension of photovoltaic modules
Developed *DOTSun Extended Life*, an on-site backsheet repair process using a PFAS-free adhesive film co-developed with Addev Materials, and a string-level monitoring system with Sicame Group

Bee Solar Holding – Project Lead ..... present
Milan, Italy
GW-scale, vertically integrated European PV manufacturing (ingots, wafers, cells, modules) with a minimal carbon footprint
Large-scale PV power plants with storage, supplying industrial customers through power purchase agreements

Andromède Investment & Consulting SAS ..... present
Échenevex, France

DuPont Photovoltaic Solutions – Regional Marketing Leader, EMEA ..... 2008 – 2021
Geneva, Switzerland
Led business development and marketing across Europe, the Middle East and Africa for DuPont's PV materials, including *Tedlar®* backsheet films and *Solamet®* metallization pastes
Promoted DuPont's global field-reliability programme (about 2 GW of installed modules surveyed since 2011), which links early panel degradation to module design and materials

DuPont – New Technology & Market Development, Electronics ..... 1991 – 2008
New-technology and market-development work for printed circuit boards, integrated-circuit packaging and organic light-emitting diode (OLED) flat-panel displays

Independent project – Rooftop PV development Mid-2000s
Co-developed three rooftop photovoltaic systems in south-west France, all still in operation

Education

University of Cambridge – PhD in Physics 1991
Graduate work in advanced physics, semiconductor technologies and photovoltaics

Awards and Grants

Prix Initiatives Circulaires – DOTSun 2024
Laureate, "Espoirs" category – Provence-Alpes-Côte d'Azur circular economy award (PRECI)

Fonds vert – Territoires d'industrie – DOTSun 2025
Grant from ADEME and the regional prefecture

Partnerships and Launches

DuPont Tedlar® PV Rescue Tape — Jul. 2021
Launch of a field repair solution for modules with damaged backsheets – pv magazine

DuPont × Envision — Mar. 2018
Predictive analytics for module degradation and backsheet failures on the EnOS platform – PV Tech

DuPont × Desert Technologies — Sep. 2017
Strategic partnership for durable solar systems in the Middle East (Saudi Arabia) – PV Tech

Talks and Webinars

Panneaux biface avec backsheet transparente : innovation, performances et fiabilité — Nov. 2020
pv magazine webinar (in French)

Large Scale Solar Digital Series — May 2020
Fireside chat – Making the most of bifacial modules and trackers

KAUST Solar Future Symposium, Thuwal, Saudi Arabia — Feb. 2019
Invited speaker

African Utility Week, Cape Town, South Africa — May 2015
Risk management for rooftop solar energy systems

DuPont × Enerpoint, Italy — Apr. 2015
Risk management for rooftop solar installations – Solarexpo, Milan

Press

DOTSun prépare sa première usine de réparation de panneaux photovoltaïques — Apr. 2026
Le Journal des Entreprises

À Tourrettes, la start-up DOTSun a mis au point une solution révolutionnaire pour prolonger la vie des panneaux photovoltaïques — Feb. 2026
Nice-Matin

L'acteur de la semaine : DOTSun, la start-up française qui propose la réparation de modules solaires sur site — Jan. 2026
pv magazine France

French startup offers on-site solar module repair solution — Jan. 2026
pv magazine International

Episode 17 – ADDEV x DOTSun : un partenariat industriel pour la transition énergétique — Apr. 2024
Podcast – ADDEV Materials (in French)

Who's Who: Stephan Padlewski — Mar. 2020
Interview – Africa Solar Industry Association (AFSIA)

Expertise

PV module repair and life extension, circular economy, PV module reliability and degradation, backsheet and metallization materials, business development, strategic partnerships, EMEA markets, electronic materials (PCB, IC packaging, OLED)
